Jose,

Thanks for the update. Can you tell if the level of proposed restoration will be affected by this proposed modification and if so, does it meet the restoration level provided under the approved program?

Subject URI's PAA-1 at Kingsville Dome (KVD)

FYI: URI filed with TCEQ a minor amendment request for PAA-1(KVD) so that the Restoration Table for Production Area No. 1 (PA No. 1) could be modified per water testing data gathered between 1983 and 1987. Mining reportedly began in PA No. 1 in May, 1988. Apparently, URI decided this minor modification was necessary after concerns were brought up in connection with the pre-mining water quality analysis for its No. I-11 well. URI's request was contested by Kleberg County and at least one citizen, who filed a Motion to Overturn the decision of TCEQ's Executive Director to grant URI's request.

We received from the Law Office of Jeb Hill a copy of "URI's Response to the Motion to Overturn" dated October 8, 2007. This is an 11 page document which arrived with a two page Affidavit signed by Mark Pelizza of URI. These documents are available for your review in my cube.
